

## Materials & Suppliers

Local sources for Cisterns, Soil, Pavers etc.

**These suppliers provide materials useful for RainWise rebate program contractors, as well as non-rebated homeowner projects.**

Seattle Public Utilities does not warrant the quality or appropriateness of these vendors' products. Shop around and use your own judgment to find products best suited for your job. If you know of a supplier who should be on this list, please send that information to [rainwise@seattle.gov](mailto:rainwise@seattle.gov)

### Cisterns

***Unless specific products are listed below, go to the manufacturer's website to find the products you're interested in, then call the distributor for price, availability, and delivery or pickup options. Be sure to plan and source all the plumbing connections you'll need before buying a tank.***

**Plumbing parts** needed for cistern installations are generally available through local home improvement stores, except

for the "bulkhead" fittings at the tank. Find out from suppliers what outlets or bulkhead fittings come pre-installed in the tank, or are available from that supplier.

**Online Cistern Vendors** Search "Water Cistern Tanks" to find online vendors. You can also find agricultural tank vendors by searching "Polyethylene Water Storage Tanks". Look for dark-colored, UV-resistant polyethelene tanks with all the fittings you need, and be sure to verify the shipping costs before ordering – tanks are expensive to ship because of their size.
