North Seattle

Do your part to protect Puget Sound

Nearly 2,000 projects completed in Seattle

When you and your neighbors choose the same contractor, the process can be more cost-effective for everyone... and more stormwater will be managed on site. Win-win! Contact us and we will help you organize a “cluster” project.

Get RainWise with your neighbors!

When you and your neighbors choose the same contractor, the process can be more cost-effective for everyone... and more stormwater will be managed on site. Win-win! Contact us and we will help you organize a “cluster” project.

Preventing polluted runoff is the key action to protect our waterways.

Be part of the solution! By slowing and cleaning runoff on your property, you are positively impacting the whole system. Rain gardens and cisterns on your property are a great way to start. One residential rain garden can divert 70% to 100% of the rain runoff from a property.

What your neighbors are saying about RainWise:

*To receive a rebate, you must live in an eligible combined sewer overflow (CSO) basin. Rebate varies from $3-4 per square foot of roof area captured, with a minimum of 400 square feet required for the rebate.
How does a RainWise **cistern** work?

A **cistern** is a large, above-ground container used to collect roof water. It is like a huge rain barrel and can hold 200 or more gallons. During the winter, RainWise cisterns collect rain and slowly release it to the sewer system. In the summer, the water can be collected and used for watering.

RainWise cisterns are especially equipped to let water trickle out slowly during the winter months. This ensures the cistern empties after each storm and is ready to fill during the next rainfall.

How do RainWise **rain gardens** work?

A **rain garden** is a shallow depression containing spongy soil and a variety of plants. It collects water from your roof downspout and allows it to slowly soak into the ground. The soil and plants act as a natural filter, cleaning the water before it enters the ground or a nearby waterway.

FAQ

**How much will my rebate be?**

Your rebate will be based on the square footage of roof area being managed. A consultation with a contractor will include an estimate of the rebate amount and a discussion of options available for your property. Your final cost (if any) will be the total project cost, minus the rebate amount. RainWise rebates cover 60-100% of project costs and are taxable under federal law.
Steps to becoming RainWise:

1. Check eligibility:
   Use our eligibility map at rainwise.seattle.gov.

2. Contact contractors**:
   Choose contractors from the list we’ve provided to the right.

3. Your contractor will handle pre-inspection, build, and post-inspection.

4. Get your rebate!
   Submit your rebate package and receive your rebate within 6-8 weeks.
