

Green Stormwater Infrastructure (GSI) By The Numbers

We lead programs, policies, and partnerships to expand the use of GSI within the City of Seattle, decreasing polluted runoff entering waterways while providing substantial environmental and community benefits. Learn more at www.700milliongallons.org

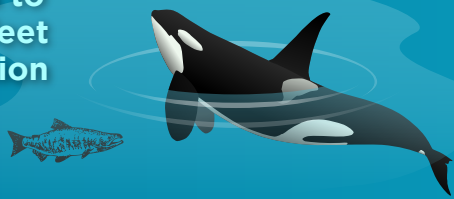

GSI AS OF 2023

533
million
gallons
managed
per year

Goal is
700
million
gallons
managed
annually
by 2025

Ahead of
target!

Equivalent to
the top 3-feet
of Lake Union

2,241
trees planted
in Seattle

12 miles
of streets greened
through bioretention

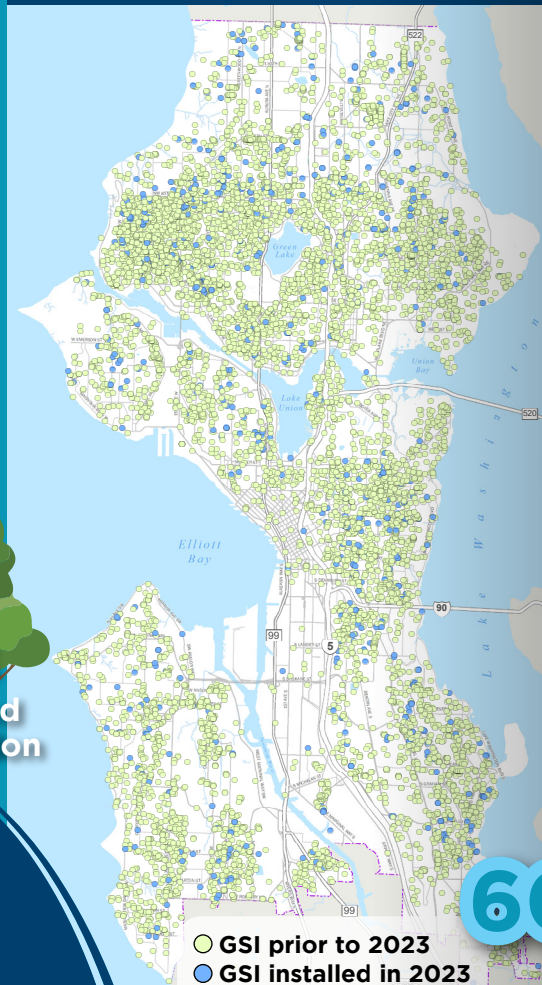

Seattle
Public
Utilities

King County

Roughly 9,400 GSI projects

GSI in 2023

Community-Centered
Implementation through:

Partnering on Private Lands

86 new **RainWise**
installations

20 mini-grants

2 Beyond Code
GSI Partnerships

Planning, Design and
Construction on Public Lands

9 Agency-led Projects

Current and past partners include: private
developers, SDOT, UW, Seattle Parks

Building GSI through Growth

600 GSI projects implemented
through stormwater code
